

MeeGo Community Device Program

Requirements Document v3

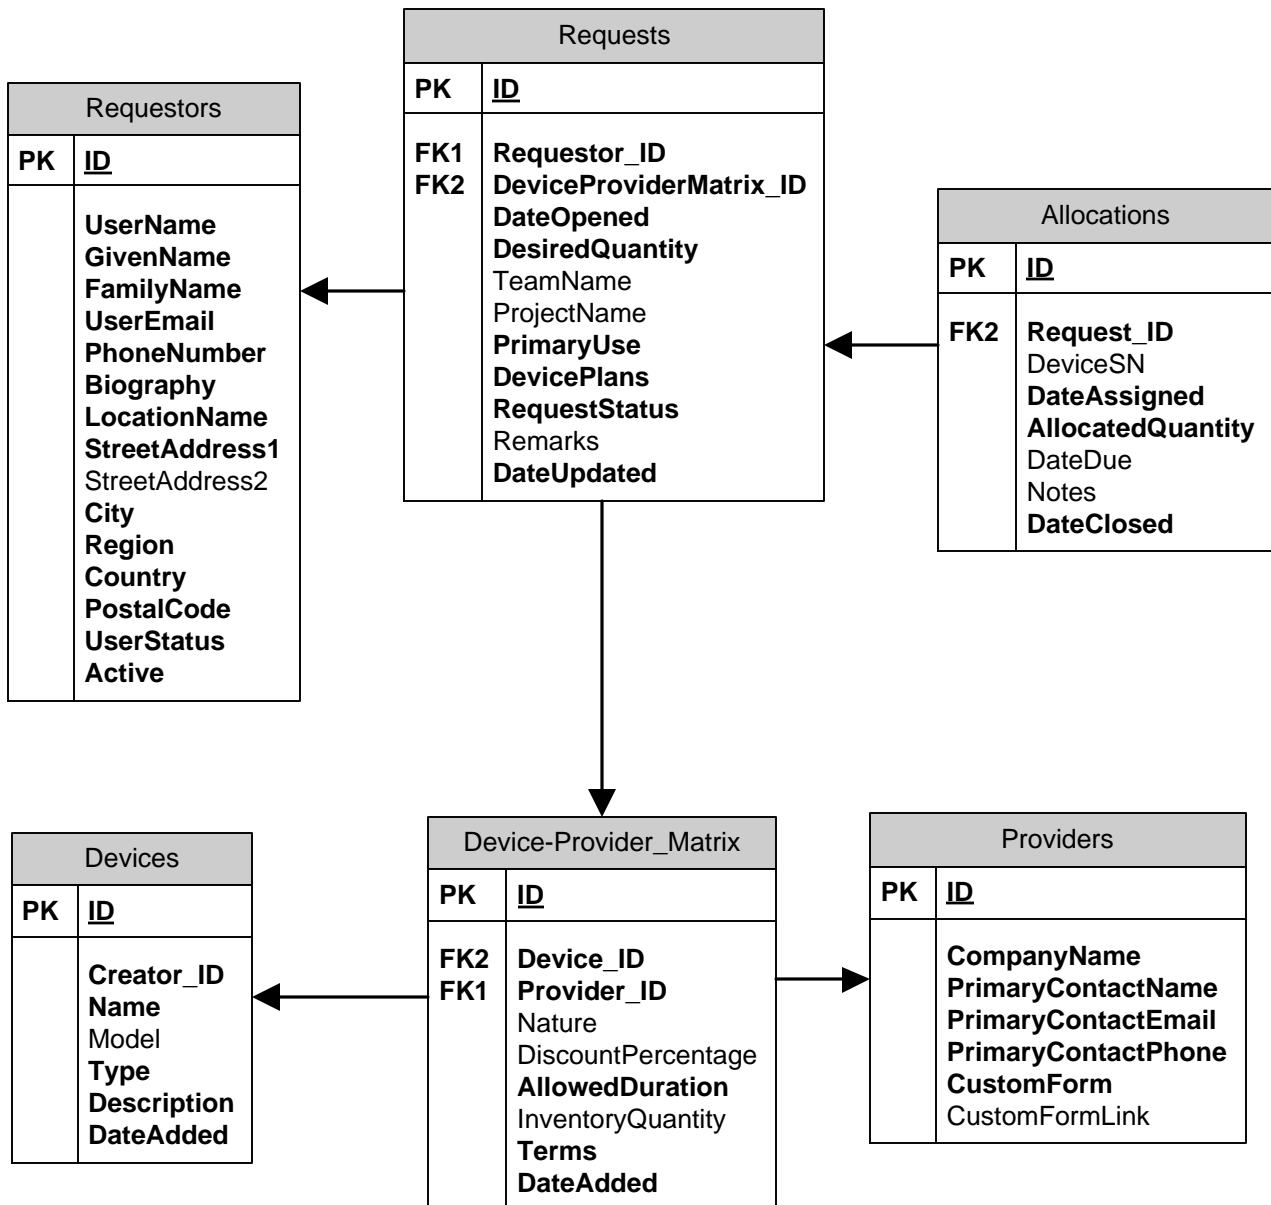

MeeGo Community Device Program

Requirements Document v3

This diagram illustrates the tables and fields necessary to for a device program management application.

Allocations is the main table, fed by Requestors and the Device-Provider Matrix table along with addition data to be entered at the time of a request.

This document is available as a Visio 2007 relational db model, which describes fields and relationships in detail.

MeeGo Community Device Program

Requirements Document v3

The screenshot shows a web form titled "Device Availability Form". On the left, there are several input fields: "CompanyName (Provider)" (dropdown), "Name (Device)" (dropdown), "Nature (Device)" (dropdown), "DiscountPercentage" (text), "AllowedDuration" (text), and "InventoryQuantity" (text). At the bottom left are "Submit" and "Cancel" buttons. On the right is a large text area labeled "Terms" with a vertical scrollbar. Annotations with arrows point to various parts of the form: one points to the top of the form with the text "Providers use this form to populate the Device-Provider Matrix table. Provider can enter multiple devices with different conditions and quantities"; another points to the "AllowedDuration" field with the text "number of days device can be used; 0 = indefinite (default)"; and a third points to the "Terms" text area with the text "Gift, Loan, Discount".

Device Availability Form

Providers use this form to populate the Device-Provider Matrix table. Provider can enter multiple devices with different conditions and quantities

Gift, Loan, Discount

number of days device can be used; 0 = indefinite (default)

MeeGo Community Device Program

Requirements Document v3

Autogenerated

Populated by login?

Enabled/changed when Device is selected. Nature = "Gift, Loan or Discount". Application can check at this point to see if a device matching the wanted requirements is available

Once a request is approved, it is linked to an Allocation record.
